1. The following is an examiner's statement of reasons for allowance: Independent claim 1 requires "receiving the scans according to a predetermined sequence; decoding each of the scans into a partial decoded pixel and a non-zero indicator, wherein the non-zero indicator represents whether or not an encoding coefficient of the current decoded scan corresponds to a non-zero value; and summing the partial decoded pixel generated from each of the scans according to the predetermined sequence, and updating a non-zero history with the non-zero indicator". The remaining claims require similar combination of elements. None of the prior art whether taken singly or in combination discloses such combination of elements. The prior art references found are Stone and Mitchell et al. These references fail to disclose the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (571) 272-7399. The examiner can normally be reached on MON-FRI.
